

HAND OPERATED PORTAL CRANE

Pelloby crane technology in a range of mobile portal cranes, designed for easy assembly and compact storage.

- Any size any capacity
- Choice of castors with optional wheel locks
- Push travel, hand geared or airfloat operation
- Designed for any type of hoist
- Optional screw down jacks.

CRANE FORK

Forklift versatility for most standard crane installation. Pelloby's crane fork allows the safe transport of loads by adjusting automatically in response to the centre of gravity.

- Adjustable fork centres from 300 – 780mm
- Large handles for easy control and positioning
- Safe working load 2 tonnes
- Self weight 214kg.

STANDARD DAVIT

Designed to meet the requirements of the manual handling regulations, the Pelloby Davit can be broken down into smaller components for ease of transportation.

- Safe working load up to 300kg
- Twin lifting eyes for index lifting
- Bearings on Slew motion
- Choice of fixing sockets, face, surface or infloor.

PORTABLE HYDRAULIC JIB

Compact manoeuvrable Pelloby's H350 portable Jib crane provides the cost effective solution to a variety of light duty handling problems.

- 3 position telescopic jib arm
- Maximum capacity 350kg at 1 metre radius
- 175kg at maximum radius of 1.75 metres
- Hydraulic pump with overload protection
- Ackerman type steering
- Solid counterbalance weight.

ATTACHMENT ACCESSORIES

Pelloby manufacture all types of lifting attachments to match your exact specification.
